

# DeLonghi Automatic Machine

[click here to see details](#)

*The machine that makes your coffee for you but lets you steam your own milk*

You can experience great tasting coffee, ground and portioned for you and then if you wish to add your milk, steam your own as you like it.

This option is the most expensive upfront but the 5 year savings are still very good. The coffee maker gets a sense of authenticity that the pod machine doesn't allow by being able to use fresh coffee beans plus you don't need to have a grinder taking up valuable space in your kitchen. The [vac sealed canister](#) is worth buying to keep your beans fresh. It is most cost effective purchasing 1kg bags of beans at a time and then keeping them fresh in a canister. Your precious coffee beans must be kept fresh!

|                                     |                    |
|-------------------------------------|--------------------|
| Machine cost                        | \$ 749.00          |
| Coffee beans 1kg x 3                | \$ 63.00           |
